

The new Unimog

An investment in the future

Please note: Changes may have been made to the product since this brochure went to press (22.03.2013). The manufacturer reserves the right to make changes to the design, form, colour and specification during the delivery period, provided these changes, while taking into account the interests of the vendor, can be deemed reasonable with respect to the purchaser. Where the vendor or the manufacturer uses symbols or numbers to describe an order or the subject of an order, no rights may be derived solely from these. The illustrations may show accessories and items of special equipment which are not part of standard specification. Colours may differ slightly from those shown in the brochure, owing to the limitations of the printing process. This brochure may also contain models and services which are not available in certain countries. This brochure is distributed internationally. It provides a general indication of the range of models, features, special equipment and/or colours available in various countries. Some of the models, features, special equipment and/or colours may not be available in your country, or may only be available in a different specification. Additionally some models, features, special equipment and/or colours may only be available in combination with others. For current and more specific information relating to the range of models, features, special equipment and/or colours available in your country, and their pricing, you should contact your nearest Mercedes-Benz Dealer. www.mercedes-benz.co.uk

More efficiency for your fleet. Over 1000 uses. 365 days a year

What really pays off for Local Authorities is economic efficiency and environmental acceptability combined with high performance. As a professional implement carrier for highway maintenance services, the new Unimog sets new standards in all of these categories.

Innovative: The newly-designed traction drive allows the driver to change over between the infinitely variable traction drive up to 50 km/h (31 mp/h) and on-road driving up to 90 km/h (56 mp/h) while still moving.

Economic: The all-rounder for year-round use is able to deal with a great number of jobs which would normally need a whole fleet of vehicles. Attached implements can be changed quickly and simply with its four attachment and mounting areas and quick change system.

Environmentally acceptable: With its state of the art BlueEFFICIENCY Power drive technology, the new Unimog complies with the emission standards for Euro VI, is environmentally friendly and has low fuel consumption.

Top performance: The new Mercedes-Benz Common-Rail diesel engines with their high torque and power output up to 220 kW (299 hp), as well as the newly-designed hydraulics systems to provide even more power.

Safe: The Unimog does not make any compromises where safety is concerned with its Anti-Lock-Brake System (ABS) providing outstanding directional stability and precise steering; Its panoramic cab and short front end dimensions also provide the best possible view of both working and driving areas.

Easy to operate: The new and intuitive controls are extremely ergonomic and simple to use - thanks to the multifunction steering wheel, simple implement controls, e.g. with the new multifunction joystick, transferable steering VarioPilot® and much more.
